

# 5FIN LAYOUT

**NOTE:** if this layout is used with different boxes the back boxes might be able to be shifted closer to the rail.

This is our current layout for a **5FIN** for a typical surfboard. It is identical to the **QUAD** layout but with the addition of the center fin. The back fin placement should be moved further inboard for boards with a straighter outline in the tail (Fish), normally this can range from 1/8" to 1/4". **Cant angles** - FRONT 8° and BACK 4°. Because of the amount of adjustment in the **GB24** boxes the placement has been altered to bring the two boxes closer together. This means that the spread of the fins can be altered by as much as 3/4" / 9.5mm.
