

KNEEBOARD TWIN LAYOUT

This is our layout for a **TWIN** for a typical kneeboard. This should be considered a starting point for your own designs. The side boxes should be moved forward or back as the length of the board changes. **Cant angles** - FRONT 4° 6° or 8° depending on desired looseness. Because of the amount of adjustment in the **GB24** boxes the placement can be altered by as much as 3/8" / 4.75mm., so consider incorporating this into the layout.
