

THRUSTER LAYOUT

This is our current layout for a **THRUSTER** for a typical shortboard. This should be considered a starting point for your own designs. The side boxes should be moved forward or back as the length of the board changes. **Cant angles** - FRONT 6° or 8° depending on desired looseness. Because of the amount of adjustment in the **GB24** boxes the placement can be altered by as much as $3/8"$ / 4.75mm.
