

TWIN LAYOUT

This is our current layout for a **TWIN FIN** for a single wing swallowtail shortboard. This should be considered a starting point for your own designs. The side boxes should be moved forward or back as the length of the board changes. **Cant angles** - 4°, 6° or 8° depending on desired looseness. Because of the amount of adjustment in the **GB24** boxes the placement can be altered by as much as 3/8" / 4.75mm. **NOTE:** this is a very radical layout we tend to put the fins further forward for more looseness and to work better with some of our large bladed fins! Traditional fishes would have the fins further back than this layout.
